

Model No. AMC 1W37

Chip	Korean-Made, 1 lamp with 3 Chips
Connection	wire to wire
Operative Voltage	12V
Current Consumption	20mA
Power Consumption	0.24W
Viewing Angle	120°
Size	L : 13mm, W : 9mm, H : 4mm
Brightness	Over 5,300mcd
Water Proof	IP68
Heat Proof	Heat-Proof Circuit design

- **(White - Single light)** : Use for surface emitting (lighting) and small channel
- **Brightness:** Korean made LED chip (5300mcd/lamp)
- **Brightness continuance:** LED Packaging with best technology in Korea.
Design to minimize damage of chip from static electricity.
Constant current for continuous same brightness of each model.
- **Water Proof** : Epoxy adherence on LED module to prevent moisture, 100% water-proof, IP 68
- **Heat Proof** : Complete heat-proof circuit design to maximize LED life and brightness
- **One Rank Chip** : Using only one rank LED chip for same white color of each module.
- **Viewing angel (No blackening)** : Using LED of 120° to maximized best outcome with minimum quantity preventing blackening on channel
