

## 7. Amplifier (ZJ-RL01 \ ZJ-RL02)

### Description

This amplifier is suitable to any LED controller which is made by us and is voltage controlling mode. RGB product is compactable with PWM mode. One amplifier extend signals doubly.

### Specification

- Working Temperature: -20-60°C
- Working Voltage: DC5V, 12V, 24V optional(to be indicated when order)
- Output: 3 channels
- Wiring Mode: common anode/cathode
- Size: L105XW65XH25mm
- Output Current: <4A per channel
- Output Watt: 5V:<60W, 12V:<144W, 24V:<288W

### Typical Application
