

Product presentation

Digital display systems consist of 7 flaps and 14 pins, which are injected in black or plastic material colours.

They are sold in individual digit sets, with 7 flaps and 15 pins per set, in a cardboard box which contains 12 digit sets of the same size.

Pins with spring for rear subjection of flaps.

Tip-up flaps, 7 per digit.

Colours, sizes and codes

For a suitable personalization for the image of each petrol station network, we have several colours in stock and we can manufacture any other colour for series.

Black

153 mm (6")	Code GDC60215
