

LIGHT GUIDE PLATE - LGP FILMS

Two versions of those films are designed to transform regular acrylic plates into ingenious light guides for edge lighting and provide excellent uniformity of brightness for shallow elements regardless of the selected backlight method.

LGP films are applicable e.g. with OWZ extrusions.

AMC System also provides LGP film installation accessories such as cleaning sheets, cleaning rolls and dedicated squeegees.

available versions

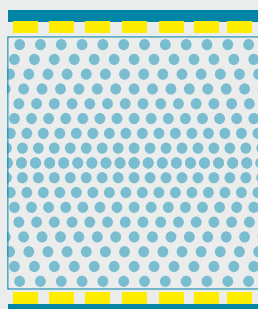

double sided LGP film
310, 460, 620, 920, 1220,
and 1520 mm of length
