

**ZALETY**

- Pobór mocy bez obciążenia 1,5W
- Układ aktywnego PFC
- Zabezpieczenia: przeciwwzarciowe/przepięciowe/przeciążeniowe/temperaturowe
- Możliwość montażu na powierzchniach łatwopalnych, np. drewnie
- Zgodność z europejskimi normami i certyfikatami
- Wysoka niezawodność
- 5 lat gwarancji

Remarks:

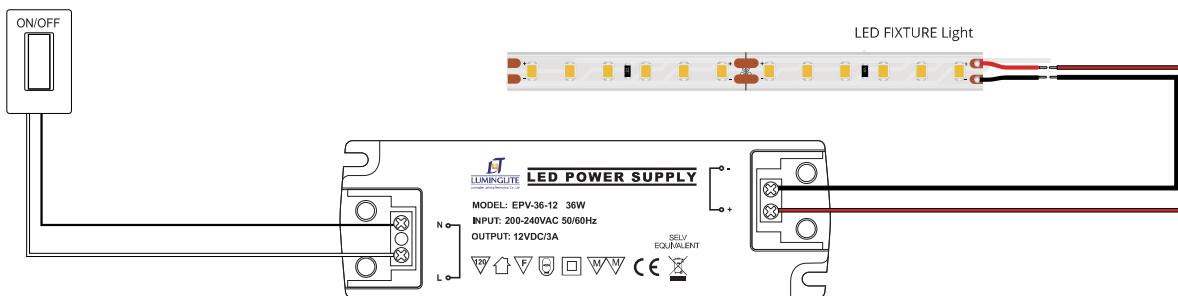

Test environment temperature : 25 ± 2°C;
 Ripple and noise measurement methods: terminal to parallel 47uF electrolytic capacity and 0.1uF ceramic capacity, in 20 MHZ Bandwidth measurement.
 "The driver is suitable for connecting resistor current-limiting LED fixture (e.g. LED strip). The inrush current will be dozens of times increased if connecting built-in constant current IC current-limiting LED fixtures, the driver will activate the overloaded protection (hiccups flickering)."

OUTPUT LOAD vs Temperature

The EPV-36-12/24 series can be operated with cooling air temperatures between -30°C- 50°C by linearly derating the total maximum output power (or current) by 2.0%/°C from 50°C to 70°C (see figure).

Attentions

- Please ensure that the ground wire is properly grounded and ensure it does not come into contact with the neutral wire.
- Please make the power supply installed in a well-ventilated place, to ensure that the environment temperature is appropriate.
- Do not overload the power supply with multiple appliances.
- Please do not touch the metal shell surface to avoid high temperature scald.
- Do not install in the minefield or high pressure area.
- Do not attempt to repair privately. Please contact the supplier if you have any questions.

Tips

- To be installed by a certified electrician. Please read and follow the instructions carefully before installing. Ensure all contact points are connected firmly.
- Please pay attention to the using environment, and conduct regular check and maintenance to eliminate safety risks.
